

SERVICES AND NAVIGATION REGULATIONS

IRAGO Suido Traffic Signal Station

All vessels intending to navigate the Traffic Route shall comply with the signals at ISEWAN MARTIS as below:

1. Position of the Traffic Signal Station is follows:

34°34'50''N, 137°1'00''E

2. Meaning of signals

"N": There is a very large vessel navigating or starting to navigate in the Irago Suido Traffic Route northwest bound. A vessel of 130 meters and over in length, (except a very large vessel of 200 m and over) which intends to navigate in the Irago Suido Traffic Route southeast bound shall stand by outside of the Traffic Route.

"S": There is a very large vessel navigating or starting to navigate in the Irago Suido Traffic Route southeast bound. A vessel of 130 meters and over in length, (except a very large vessel of 200 m and over) which intends to navigate in the Irago Suido Traffic Route northwest bound shall stand by outside of the Traffic Route.

Alternating "N" and "S" :

A vessel of 130 meters or over in length (except a very large vessel of 200 m and over) which intends to navigate in the Irago Suido Traffic Route shall stand by outside of the Traffic Route.

Electric Sign Boards for small boats

ISE WAN MARTIS indicates approaching very large vessels via an electric sign board for small fishing boats or pleasure boats. The board's location is above the Traffic Signals.

⇒: Right Arrow with one flash every 4 seconds means a southbound large vessel is expected within one hour.

⇒: Right Arrow with one flash every 2 seconds means a southbound large vessel is expected within 15 minutes.

⇐: Left Arrow with one flash every 4 seconds means a northbound large vessel is expected within one hour.

⇐: Left Arrow with one flash every 2 seconds means a northbound large vessel is expected within 15 minutes.
